

Pre-Session Checklist

for MTS Training with Marcos

To make the most of your session, here are a few things to bring or think through:

Setup

- ☐ Are you working in a **live**, **test**, or **simulated** MTS environment?
 - ☐ Do you have access to relevant configuration files (e.g., `route.cfg`, `settings.cfg`)?
-

Files You Might Want Handy

- ☐ A sample **error log** or recent incident
 - ☐ Your current **pakman installation manifest**
 - ☐ Any custom rule setups or processing chains you're struggling with
 - ☐ Notes from a previous implementation (optional but helpful)
-

What You'd Like to Learn

- ☐ List 1–3 specific questions or areas of uncertainty
 - ☐ Are you trying to **debug**, **learn**, or **optimize**?
-

Session Logistics

- ☐ We'll meet via Zoom/Teams/Meet (your preference)
 - ☐ Feel free to screen-share and ask freely — this is collaborative
 - ☐ Recording is optional — just ask before we begin
-

Looking forward to working together!
